<https://phillipfriispetersen.netlify.app/>

Hi, my name is Phillip. I'm incredibly passionate about technology, software development and UX-design. Specializing in Frontend Development, I am passionate about bringing together creative designs with code. I aspire to perform the best I can while also executing proudful results. I love to express myself creatively not only in music but also visually and in problem solving. So I'd also describe myself as being an easy and ambitious learner that possess a proactive and analytical mindset. I aspire to be the best colleague I can be. An environment where growth, humor and positivity is present, is the place I want to belong to. Danish is my native language, but I do also speak and write fluently in english. Take a look at my portfolio through the link above.

AUGUST 2016 - DECEMBER 2016

SPARETIME & HOBBIES

My biggest passion in life is music. I've been playing guitar for approximately 17 years. I also happen to play in two bands. The music we write and perform is noisy and harsh. In recent years we have released quite a huge amount of music and played a lot of shows. The shows have not only occurred in Denmark but also from touring in Europe. I love playing music together with my friends. During our shows I enter a very euphoric state and I feel like we are unstoppable. It's without a doubt the best experience/feeling I've encountered in my life.

My two bands are:
TELOS
Regarding Ambiguity
